

PCF's Super Safety Saturday - Flying with GPS

This presentation is for both VFR and IFR pilots and discusses how GPS does what it does. Come find out how GPS works, and for rules and tips on how to use it and what you should look out for.

Kathy's presentation of the operation and use of the GPS system is very thorough, illuminating, interesting and complex. There are a lot of buttons to push, new terminology, uncanny accuracy and built in safeguards.

Directions: The meeting will be held at the Palomar Airport Administration Building which is the first structure on the left as you enter the airport property. Please proceed past the building to the main parking lot which is down a short grade on the left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
